

Mobile Applications for Healthcare

Bring “Less Touch, More Trust” to the healthcare environment

Today, rf IDEAS® extends our industry-leading WAVE ID® authentication technologies into the industry’s most flexible and accessible range of mobile credential solutions.

These on-the-go, contactless solutions provide seamless authentication via smartphone credentials while offering compatibility with existing cards.

Mobile Applications for Healthcare

Here are just a few of the ways that mobility delivers a clear advantage in safety, security and productivity

Identity Access Management

Use WAVE ID® Mobile readers with integrated **Bluetooth®** technology to simplify HIPAA compliance and eliminate usernames and passwords. Access records, medications and devices with a quick wave versus time-consuming logins.

Time & Attendance

Automatically and accurately capture employee credentials to analyze arrivals, departures, breaks, contractor or payroll hours. Safely and hygienically track attendance at required medical training sessions or events while also adding contact tracing capabilities.

Secure Print

Use smartphone credentials to provide simple, powerful protection against unauthorized access to confidential patient records and hospital data found on network-connected multifunction printers.

Smart Wallet

Give employees a fast and convenient way to login and pay for restaurant/cafeteria items, health club memberships or other on-premise perks.

Training

Securely and effortlessly track employee attendance at required medical training sessions, seminars or mandatory events.

Patient Care

The average healthcare employee enters passwords 70 times each day. Mobile credential solutions eliminate this tedious task, allowing more time for patient care.

Mobile Applications for Healthcare

A wide range of high-performance readers

WAVE ID® Mobile Readers

To support a mobile workforce, rf IDEAS® offers dual-frequency readers that incorporate a **Bluetooth®** reader for mobility while reading existing 125 kHz proximity or 13.56 MHz contactless smart cards across desktop, nano and embedded form factors.

Our growing list of mobile credential readers include:

WAVE ID® Mobile Reader
for Orange Business Services Pack ID

WAVE ID® Mobile Reader for Safetrust Wallet

WAVE ID® Mobile Reader for HID Mobile Access®
